

Free yourself.

When you're suspended after a fall, every second matters.

When the clock starts ticking, you need a rescue plan you can count on to rescue you quickly and efficiently. The DBI-SALA® Self-Rescue unit is your rescue plan: a flexible device that attaches to your current safety harness and allows you to lower yourself to safety in the event of a fall from height. This simple, fast and effective rescue plan minimizes risk for you, your coworkers and emergency response personnel.

With DBI-SALA Self-Rescue, you can work at height without worrying about hanging in your harness for an extended period of time after an arrested fall event. Instead of wondering how long it will take to alert others to your fall, or how long before trained rescuers can gather the appropriate equipment to get you down, you can simply avoid all that and free yourself.

Free yourself to train regularly.

This 30-foot trainer device simulates a realistic fall rescue experience, allowing you to educate your team on the use of the product. It's easy to rewind the rope on-site, so you can train your team up to 20 times before recertification of the device will be required.

Fits on to almost any safety harness.

Free yourself to use your own safety harness.

Universal attachment.

Now you can add the benefits of a self-rescue device to your safety equipment without the added expense of purchasing a new harness. DBI-SALA® Self-Rescue retrofits to almost any safety harness, so you can keep wearing the one you're most comfortable using.

Free yourself with simplified lifeline connections.

EZ-Link™ D-ring.

The EZ-Link stand-up D-ring provides a simple, fast connection point for your lanyards or personal self-retracting lifelines (SRLs). This patent-pending technology is tested to speed up connection and disconnection times by up to 80%, delivering convenience and time-savings every time you climb.

Free yourself to choose the length you need.

50 or 100 foot lengths.

Every at-height work site is different, so it only makes sense that your safety equipment fits the job you set out to do. With both 50- and 100-foot models to choose from, DBI-SALA Self-Rescue gives you more flexibility and convenience whatever your work site application needs may be.

Free yourself with the help of a colleague.

Assisted-Rescue Ring & DBI-SALA Rescue Pole accessory.

In the event you're incapacitated during a fall and are unable to activate DBI-SALA Self-Rescue, the assisted-rescue ring allows for remote access and deployment by a colleague. For added efficiency, the telescoping DBI-SALA Rescue Pole accessory extends your reach and easily hooks into the ring, providing for a safe, efficient assisted-rescue.

Easily accessible primary release cord.

Molded padding protects the bag from additional wear and tear when personal SRLs are worn.

Color-coded and reflective elements direct the eyes and provide greater visibility, even in dark situations.

Lightweight, low profile design minimizes impact on user's motion.

Unit width: 7 in

Free yourself from durability concerns.

Sealed Descent Device & Rope Spool.

When you're working in harsh environments, you can't afford to worry about equipment failure. That's why DBI-SALA Self-Rescue is designed and tested to withstand the toughest conditions.
