WESTFALL PRO PSK

WESTFALL PRO PSK

Westfall Pro PSK and 100% polyester rope, and is the ideal rope for use in rescue kits, vertical lifelines, and ascent/descent rope access work. Developed alongside the people that use static rope everyday to be the ultimate kernmantle rope. PSK is durable, extremely strong, and has very low stretch. The rope has extremely high resistance to abrasion thanks to the firm, smooth sheath. This also reduces the risk of debris working its way into the core, which could impact the strength and handling properties.

This rope also performs consistently regardless of condition. Wet or dry, hot or cold, the polyester construction allows PSK to operate as expected every time. It's available in 7/16" or 1/2" in 5 different colors to allow easy identification of rescue, lifelines, or work positioning lines. Alternatively users can color code their rope by length.

PSK is available with or without sew eyes, however most stock ropes will have eyes included.

Key Features: • Maximum strength • Extremely low stretch • Firm, smooth sheath mitigates debris penetration, and increases durability • Multiuse - Perfect for rescue, vertical lifelines, and ascent/descent • Operates consistently in wet and dry conditions
